4. Complete remaining steps and finally verify the account information

- Deliver personalized ads, depending on your account settings, both on Google services and on sites and apps that partner with Google;
- Improve security by protecting against fraud and abuse; and
- Conduct analytics and measurement to understand how our services are used. We also have partners that measure how our services are used. [Learn more](#) about these specific advertising and measurement partners.

Combining data

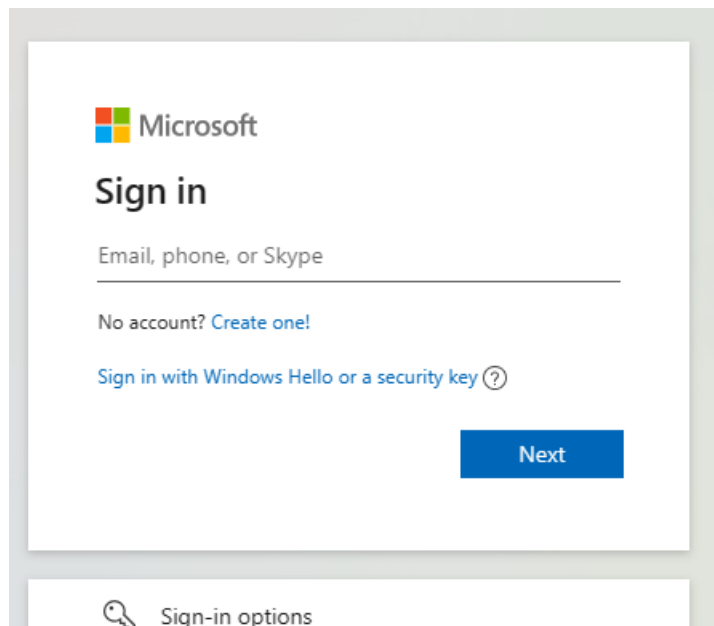

We use your data to personalize your experience on our services. This includes combining information from different sources to give you a more personalized experience, based on your saved activity and associated info. One of those settings is Web & App Activity. You can change this and other settings by selecting "More options" below.

We use your data to personalize your experience on our services, but you can change this and other settings by selecting "More options" below. You can always change your settings later by visiting account.google.com.

Keep in mind

To personalize your experience when you're signed in to your Google Account, the Web & App Activity setting will save your activity and associated info, including location data, like your device's general area and IP address. Web & App Activity data will be saved for 18 months, but

[Sign in to your Microsoft account \(live.com\)](#)

The image shows the Microsoft sign-in interface. At the top left is the Microsoft logo. Below it, the text "Sign in" is displayed in a large, bold font. Underneath, there is a text input field with the placeholder text "Email, phone, or Skype". Below the input field, there are two links: "No account? Create one!" and "Sign in with Windows Hello or a security key (?)". At the bottom right of the sign-in area is a blue button labeled "Next". Below the sign-in area, there is a section titled "Sign-in options" with a magnifying glass icon.
